Trading Non-Farm Payroll

WHAT IS NON-FARM PAYROLL (NFP) ?

On the first Friday of every month, the Non-Farm payroll report is released by the United States Department of labor . The NFP (Non-Farm payroll) report Causes one of the most consistently largest rate movements of any news announcements in the financial market, which leads to a positive effect on the Nation's currency

Job creation is an important indicator of economic health, because consumer spending which is highly correlated with labor conditions makes up a large Portion of **GDP**. The report is the first of the month that relates to labor conditions, making it susceptible to big surprises. The release of the NFP Generally occurs on the first Friday of every month at 8.30 EST.this news creates a favorable environment for investment traders because it provides a near guarantee of a tradable move following the announcement

FUND OVERVIEW

The Non-Farm Payroll is a private trade executed during the most favourable conditions of the market. The Non-farm payroll consists of 2 phases designed to provide consistent returns for clients looking to invest in a short term investment. The Non-Farm Payroll seeks to mitigate the complexities of investing in short term assets by providing investors with outsourced trading, operations, finance, and custody / digital asset private key protection services.
